

The NSC List of Subsidy Recipients

Each year, The National Science Council provides university students with financial incentives to carry out research under the Special Research Plan Subsidy. This year, a total of 36 such subsidies were granted to Tamkang students; the largest number of recipients in the past several years. Out of the 36 recipients, the College of Engineering dominated, with a total of 23 successful applicants.

One of TKU' s subsidy recipients, fourth year Department of Chinese Literature Student, Wei Yijun, received a grant for her research on Hu Shuwen' s style of novel-writing. She explores the method Hu uses to avoid the traditional stereotypes of women in novels and to successfully portray the world from the perspective of a young woman.

Other grant recipients include Department of Electrical Engineering' s Lin Hui-bo, who explored the visual perception system of soccer robots ("Robosoc"), and Department of Chemical & Materials Engineering' s Chang Yu-hsing, who investigates the stabilization & filtration of yeast.
