

A Physics Fair is Held for High School Students

【Reported by Bo-xian Lu, Tamkang Times】 The Department of Physics is moving Taipei' s Technology Building here! Last month on the 28th the Department of Physics displayed various different devices and gadgets to be viewed by almost a hundred high school students. This physics event attracted lots of youth to come and peer deeper into the field of physics. Assistant professor of the Department of Physics, Dah-chin Ling, stated, “Now a days it’ s so easy for people to have many misconceptions of what physics entails. So it is a great and rare chance for everyone to learn in different ways besides reading. The kids really enjoy playing and learning with physics. I want to thank everyone involved that made this event possible.”

In the morning there are three different lectures prepared: “What is an alien?” “Utilization of Radiation” , “Locating the God particle” All of the lectures are designed to get the kids a much deeper understanding from an interesting and rational point of view. All of the devices on display provide the children with a physical illustration that allows the students to grasp new and more difficult concepts.
