

## **TKU Makes Agreement for Academic Industry Boat Design Program**

【Reported by Huan Zhuang, Tamsui Campus】 In order to increase research at the university, Supervisor of the Industry-Academy Cooperation Section, Chien-yu Wang, Professor of the Department of Electrical Engineering, Shung-wen Kang, Professor of the Department of Chemistry, Kuo-jen Hwang and Professor of the Department of Physics, I-nan Lin, headed to Ship and Oceans Industries R&D Center for an academic visit. The discussion revolved around aspirations of the Ship and Oceans Industries R&D Center cooperating with Tamkang for an academic-industry internship in the near future.

The professors of TKU put forth various ideas and concepts that would be beneficial, such as the “Internet of Things” , using sensors and detectors that can help the facilities and devices on boats and a method to prevent water contamination. Chien-yu Wang expressed, “I really look forward to being able to gain some practical experience that will help our boat design skills in the future.”
