

Ministry of Economy Officials Satisfied with the Work Done by T.K.U.' s Champion Incubator Center

A team from the Medium and Small Businesses Section, Ministry of Economy, had visited Tamkang University' s Champion Incubator Center on September 20, Thursday. Having attended a briefing by Dr. Kao Huey-chuen, Director of the Center, they were very much impressed with the progress made by the Center.

Also present to hear the briefing were Pres. Chang Horng-jihn, Prof. Feng Chao-kang, V.P. for Academic Affairs, Prof. Lin Kwang-nan, Director of the Office of Research and Development, Prof. Chen Kan-nan, Dean of the School of Sciences, etc. Many faculty have helped out the Incubator Center, Pres. Chang informed the visiting officials. Their aggressiveness should be appreciated, and a high- technology success is insured in the foreseeable future, Pres. Chang continued to assure us.

After a tour around the Center, and an exchange of view with the Center' s Director, visitors made several recommendations. They think that as a different phase fosters a different attitude, different specialists should be employed to create a new enterprise environment. However, given the shortage of manpower, the Center should employ more than one full-time employee to meet the challenge in the future.
